Pencil Sharpeners – Please Note Product Codes

Prior to Nauticalia's acquisition of SDL Imports, both companies had established ranges of die-cast metal pencil sharpeners which were, in some cases, identical but with different product codes. We have now settled on only one product code for each design. This means you may find the code stored in your purchasing system is discontinued, but the item is still available under a different code. Please order using the codes below and update your records.

Glass Fishing Floats

Glass Fishing Floats

Encased in netted rope, these hollow floating coloured glass spheres were used to support fishermen's nets and to mark lobster pots for retrieval from the seabed. Today they are commonly used as interesting decor. Each is hand-blown to create an authentic bulls-eye at the cut-off point - no two are identical (hence measurements are approximate).

Oscar Borgström

Designed for us by Swedish artist Oscar Borgström – well-known in his home country for his lighthouse-themed art – this exclusive range of souvenirs depict some of the British Isles' best-loved lighthouses. We've roughly grouped them in to East Coast and South Coast ranges, to suit many popular tourist destinations, but all are eye-catching and just as appealing to those away from coastal locations.
